

JDH

JDH 2024 STICK GUIDE

COMPOSITION

X93

The best selling JDH stick of all time, with updated graphics, new moulds and the same reliability and performance. Manufactured with high grade Japanese carbon and finished with 3K Carbon Twill Cloth

X79

The X79 has been a huge success internationally since 2015. It's light weight and high balance point enables faster swing speeds when hitting and slapping the ball

X60

The X60 is a fantastic intermediate level stick, with the same soft touch feel and high level of power as other JDH models. The JDH X60 has the signature JDH Taper Toe head.

X01

Fully composite entry level stick, the X01 can't be beaten for performance and value. Using 30% carbon, the X01 is perfect for entry level players using senior size lengths.

STICK SHAPES

EXTRA LOW BOW

The Extra Low Bow has an extremely low bow point, great for 3D skills, overheads and flickering.

Bow Point: 200mm | Curve: 24mm

LOW BOW

The Low Bow has the advantage of a larger and lower curve position, aiding in 3D Skills

Bow Point: 250mm | Curve: 24mm

MID BOW

Our Mid Bow mould is designed for players wanting a straighter stick, perfect for hitting flat and hard, lots of players playing on grass prefer this mould

Bow Point: 300mm | Curve: 24mm

PRO BOW

The JDH Pro bow was first added to the range in 2021. The shape is similar to the Low Bow but with a more consistent curve

Bow Point: 250mm | Curve: 24mm

CONCAVE

Designed with a concave face for ball speed and accuracy when flicking, this stick is the ultimate dragflicking weapon

Bow Point: 200mm | Curve: 24mm
